BEFORE INSTALLATION

First, make sure the mains supply is switched off!

PROGRAMMER ONLY

The programmer must be set to the type of system it is to control. The link on the back of the unit has two settings - P and G.

- P = a fully pumped and controlled system allowing heating and hot water to be set separately.
- G = a gravity-fed hot water system which does not allow independent setting of heating without hot water, though

hot water can be controlled alone USING AN EXISTING WALL-PLATE

Loosen the securing screws on the old programmer and unplug it. Check that there's 70mm clearance to the right of the wall-plate, and 25mm above it. Check the chart on the next page to compare terminals and if necessary, change the wiring of the wall-plate to suit. Now plug the Lifestyle unit into the wall-plate and tighten the securing screws.

Check the 3A fuse, and switch on the mains.

FITTING A NEW WALL-PLATE

The ideal location is 1.4m above floor level, with reasonable lighting, good access, no condensation, no extremes of temperature, and a supporting surface that fully covers the back of the unit.

Position with 70mm clearance to the right, 25mm above, and sufficient room to access the securing screws underneath.

Fix, with terminals at the top, either direct to a flat wall using wall plugs and No. 6 x 1" (25mm) woodscrews, or on a flush mounting single conduit box type UA1 (BS4662) using M3.5 x 14 bolts. DO NOT USE A SURFACE MOUNTING BOX.

Installer note: After installation, tear along perforations in the User instructions with the end user

Drayton Lifestyle SERVICE INTERVAL SINGLE DUAL **CHANNEL** CHANNEL Timeswitch Programmer for heating AND hot water for heating OR hot water LP111Si, LP711Si LP241Si, LP522Si, LP722Si SINGLE DUAL CHANNEL GHANNEL **Over-riding the program** User's Instructions 06490050001 ISSH Technical Helpline: 0333 6000622 Email: customer.care@draytoncontrols.co.uk Web: www.draytoncontrols.co.uk What is a programmer? ...an explanation for householders Programmers allow you to set 'On' and 'Off' time periods. Some models switch the central heating and domestic hot water on and off at the same time, while others allow the domestic hot water and heating to come on and go off at different times. Set the 'On' and 'Off' time periods to suit your own lifestyle. On some programmers you must also set whether you want the heating and hot water to run continuously, run under the chosen 'On' and 'Off' heating periods, or be permanently off. The time on the programmer must be correct. Some types have to be adjusted in spring and autumn at the changes between Greenwich Mean Time and British Summer Time. You may be able to temporarily adjust the heating programme, for example, 'Override', 'Advance' or 'Boost'. These are explained in the manufacturer's instructions. The heating will not work if the room thermostat has switched the heating off. And, if you have a hot-water cylinder, the water heating will not work if the cylinder thermostat detects that the hot water has reached the correct temperature. **User's Instructions TIMESWITCHES** INTRODUCTION Lifestyle Timeswitches will automatically control your system by switching it on and off at times that suit you. The light on the front of the timeswitch shows when it's on. LP111Si – a 24hr program, up to 3 heating periods each day, and every day the same. LP711Si – a 7-day program, allowing for different timings on each day of the week, up to 3 heating periods each dav. If the engineer hasn't set your timings for you, your timeswitch will work with a standard program that has been set at the factory. If this doesn't suit you, it's very easy to change it when you've read this introductory section, simply turn to the page for your timeswitch model. SET? YES/- + SELECT ()()() ()Make your changes using the SET?, YES/-, and + buttons on the programmer, found under the bottom flap. Vou can't set ON1 as the last timing before midnight, but you can set OFF3 after midnight – providing it's not more than 23 hours and 59 minutes after ON1. You need to set the timings in sequence – i.e. ON1, OFF1, ON2, OFF2, ON3, OFF3. If you get out of sequence, the display will flash a warning. SWITCHING **ON 1** – start of first timed period **OFF 1** – end of first timed period **ON 2** – start of second timed period

OFF 2 – end of second timed period

ON 3 – start of third timed period

OFF 3 – final switch-off of the day

for future reference.

DAY-TO-DAY VARIATIONS

Sometimes you might need to change the way you use your system temporarily - perhaps due to an exceptionally cold day. Here's how to do it - without affecting the timings in your program.

Switching on and off

you can either -

Press Advance to switch it on (ADV will be displayed), and it will stay on until the end of the next period. Or if the heating is on and you don't need it, press Advance and it will go off until the beginning of the next ON period

2. Press & Hold Boost to switch on for an extra hour (b)& BST will be displayed), then Press again for two (b2) or three (b3) hours. To cancel Boost, Press Boost again (bD). Or if the heating is already on, using Boost will extend the ON time by one, two or three hours.

12:38 RM OFF continuously off. TIMED = on for up to 3 periods a day. ONCE to the end of OFF3

ON = continuously on.

mode This won't alter the timings in your program, which you can return to by selecting TIMED

THE LP111Si 24hr ELECTRONIC TIMESWITCH

LP111Si – a 24hr program, up to 3 heating periods each day, and every day the same Want to leave a timing as it is? Just press SET? and move on to the next one

If you need to reset your timings to the standard program and start again, press 'SET' and '+' together to go back to the pre-set program.

The standard program

OFF 3 - final switch-off of the day

Changing the timings

Press the SET? button and you'll see 'SET PROG?'.

SET

heating period. Adjust it in 1-minute steps using the - and + in 10-minute steps.

6:30an

Press SET?, and you'll see OFF1, the end of your first heating period. Adjust this in the same way, press SET? then repeat the procedure for ON2, OFF2, ON3 and OFF3

8:30an •

When you press SET? after setting OFF3, the timeswitch will return to normal operation

Want to leave a timing as it is? Just press SET? and move on to the next one. If you need to reset your timings to the standard program and start again, press 'SET' and '+' together to go back to the pre-set program.

The standard program

that middle period or change any other timings - read on.

If the engineer has set your program and timings – you won't need to do anything else. Just keep this guide in a safe place

On the front of the timeswitch there is an Advance/Boost button It allows you to switch your system either on or off, irrespective of the program. So if the heating is off, and you want warmth now,

Advance will only operate in TIMED or ONCE modes.

At the side of the display there are four operating modes:

= on for 1 period a day, from the start of ON1

Use the SELECT button under the flap to change the

Your system will come on for up to 3 heating periods every Notice that ON2 and OFF2 are set to the same time.* This means your system won't respond, but if you want to activate

	STANDARD PROGRAM
	6.30am
	8.30am
*	12.00pm
1*	12.00pm
	4.30pm
	10.30pm

Press the YES button, and you'll see ON1, the start of your first uttons. If the – and + buttons are held down, the time changes

LP711Si – a 7-day program, allowing for different timings on each day of the week, up to 3 heating periods each day.

Your system will come on for up to 3 heating periods every 24hrs. ON1 starts the first one, OFF1 finishes it, and so on. Notice that ON2 and OFF2 are set to the same time.* This means your system won't respond, but if you want to activate

THE LP711Si 7-DAY ELECTRONIC TIMESWITCH Cont...

SWITCHING	STANDARD PROGRAM			
SWITCHING	MON-FRI	SAT-SUN		
ON 1 – start of first timed period	6.30am	7.00am		
OFF 1 – end of first timed period	8.30am	9.00am		
ON 2 – start of second timed period*	12.00pm	12.00pm		
OFF 2 – end of second timed period*	12.00pm	12.00pm		
ON 3 – start of third timed period	4.30pm	4.00pm		
OFF 3 – final switch-off of the day	10.30pm	11.00pm		

Changing the timings

Press the SET? button and you'll see 'SET PROG?'

Set all weekdays

First you set the times that are going to be the same for each weekday, then you can select each day individually and make any further adjustments. If you want each day to be quite different, go straight to 'Set each day'.

Press the YES button, and the display will ask 'SET MON to FRI PROG?

Press YES and you'll see ON1, the start of your first heating period. Adjust it in 1-minute steps using the - and + buttons. If the - and + buttons are held down, the time changes in 10-minute steps.

5:30 RM MON TUE WED THU FRI PROG	(

Press SET?, and you'll see OFF1, the end of your first heating period. Adjust this in the same way, press SET?, then repeat the procedure for ON2, OFF2, ON3 and OFF3.

8:30rm MON TUE WED THU FRI PROG	OFF	

Set each day

If, after you've set OFF3 you want to fine-tune one or more weekdays, press SET? until you find the first day you want to adjust - then go through the procedure, altering any time you wish. Press SET? to move on to the next day. When you've finished, press SET? until you see 'SET SAT SUN PROG?'.

If you don't want to alter any individual days, keep pressing SET? until you see 'SET SAT SUN PROG?'

Set weekend

Press YES and alter ON1, OFF1, ON2, OFF2, ON3 and OFF3 times in the same way

Set each day

If, after you've set OFF3 for both SAT & SUN, you want to finetune Saturday or Sunday, press SET? until you find the first day you want to adjust - then go through the procedure, altering any time you wish. Press SET? to move on to the next day. When you press SET? after setting your hot water for Sundays, the programmer will go back to normal operation.

SET

If you don't want to alter either day, keep pressing SET? until the programmer goes back to normal operation.

User's Instructions PROGRAMMERS

If the engineer has set your program and timings – you won't need to do anything else. Just keep this guide in a safe place for future reference.

INTRODUCTION

Lifestyle Programmers will automatically switch your central heating and hot water on and off at times that suit you. Depending on your system, central heating and hot water can either both come on and off at the same time, or work independently. The light on the front of the programmer shows when each one is on.

INTRODUCTION Cont...

There are 3 models in the Lifestyle range

- LP241Si a 24hr program, with central heating and hot water working independently for up to 3 heating periods each day, and every day the same.
- LP522Si a 5/2-day program allowing for different timings at the weekends, with central heating and hot water working independently for up to 3 heating periods each day.
- LP722Si a 7-day program allowing for different timings on each day of the week, with central heating and hot water working independently for up to 3 heating periods each day.

If the engineer hasn't set your timings for you, your programmer will work with a standard program that has been set at the factory. If this doesn't suit you, it's very easy to change it when you've read this introductory section, simply go to the section that contains your programmer model.

Remember:

- Make your changes using the SET?, YES/-, and + buttons on the programmer, found under the bottom flap.
- Vou can't set ON1 as the last timing before midnight, but you can set OFF3 after midnight - providing it's not more than 23 hours and 59 minutes after ON1
- You need to set the timings in sequence i.e. ON1, OFF1, ON2, OFF2, ON3, OFF3. If you get out of sequence, the display will flash a warning.

SWIT	CHING
ON 1	– start of first timed period
OFF 1	 end of first timed period
ON 2 ·	 start of second timed period
0FF 2	– end of second timed period
ON 3 ·	 start of third timed period
OFF 3	- final switch-off of the day

The engineer has set your program and timings – you won't need to do anything else. Just keep this guide in a safe place for future reference.

DAY-TO-DAY VARIATIONS

Sometimes you might need to change the way you use your central heating or hot water temporarily – perhaps due to an unusually cold day, or exceptional demand for hot water. Here's how to do it – without affecting your program.

Switching on and off

On the front of the programmer there are two Advance/Boost buttons – one for central heating and one for hot water. They allow you to switch your system either on or off, irrespective of the program. So if the heating or hot water is off, and you want warmth or hot water now, you can either -

- 1. Press Advance to switch it on (ADV will be displayed), and it will stay on until the end of the next period. Or if the heating/hot water is on and you don't need it, press Advance and it will go off until the beginning of the next ON period.
- Advance will only operate in TIMED or ONCE modes.
- 2. Press & Hold **Boost** to switch on for an extra hour (h) & BST will be displayed), then Press again for two (b2) or three (b3) hours. To cancel Boost, Press Boost again (b0). Or if the heating/hot water is already on, using Boost will extend the ON time by one, two or three hours.

Over-riding the pr

On each side of the display there are four operating modes – one group for central heating, the other for hot water. You can change modes with immediate effect by using the appropriate SELECT button. This won't alter the timings in your program, which you can return to by selecting TIMED.

0FF	=	continuously off.
TIMED	=	on for up to 3 periods a day.
ONCE	=	on for 1 period a day, from the start of ON1 to the end of OFF3.
ON	=	continuously on.

THE LP241Si 24hr ELECTRONIC PROGRAMMER

LP241Si – a 24hr program, with central heating and hot water working independently for up to 3 heating periods each day, and every day the same.

If the timings haven't been set for you, then your programmer will still be on the factory-set standard 24hr program, with central heating and hot water operating together on the same timings for every day of the week. But it's easy to make changes, and have heating and water working independently - just follow the instructions.

Want to leave a timing as it is? Press SET? and move on to the next one.

If you need to reset your timings to the standard program and start again, press 'SET' and '+' together to go back to the pre-set program.

If you don't press anything for two minutes, the programmer automatically goes back to normal operation.

THE LP241Si 24hr ELECTRONIC PROGRAMMER Cont...

The standard program

Your system will come on for up to 3 heating periods every 24hrs. ON1 starts the first one. OFF1 finishes it. and so on. Notice that on the standard program ON2 and OFF2 are set to the same time for both central heating and hot water. * This means your system won't respond, but if you want to activate that middle period, or change any other timings - read on.

SWITCHING	STANDARD PROGRAM
ON 1 – start of first timed period	6.30am
OFF 1 – end of first timed period	8.30am
ON 2 – start of second timed period*	12.00pm
OFF 2 – end of second timed period*	12.00pm
ON 3 – start of third timed period	4.30pm
OFF 3 – final switch-off of the day	10.30pm

Changing the timings

Press the SET? button and you'll see 'SET PROG?'.

Set the central heating

Press the YES button, and the display will ask 'SET CH PROG?'

Press YES and you'll see ON1, the start of your first central heating period. Adjust it in 1-minute steps using the - and + buttons. If the – and + buttons are held down, the time changes in 10-minute steps.

Press SET?, and you'll see OFF1, the end of your first central heating period. Adjust this in the same way, press SET?, then repeat the procedure for ON2, OFF2, ON3 and OFF3.

Set the hot water

When you press SET? after setting OFF3 for the central heating, the display will ask 'SET HW PROG?'.

- Press YES, then set your times in the same way. Remember, in this mode you can have different times to your central heating if you wish.
- When you press SET? after setting OFF3 for the hot water, the programmer will return to normal operation.

THE LP522Si 5/2-DAY ELECTRONIC PROGRAMMER

LP522Si – a 5/2-day program allowing for different timings at the weekends, with central heating and hot water working independently for up to 3 heating periods each day. If the timings haven't been set for you, then your programmer will still be on the factory-set standard program. This means that central heating and hot water will operate together, with the same timings for weekdays and different ones for the weekend. But it's easy to make changes, and have heating and water working independently – just follow the instructions. Want to leave a timing as it is? Press SET? and move on to the next one

If you need to reset your timings to the standard program and start again, press 'SET' and '+' together to go back to the pre-set program

If you don't press anything for two minutes, the programmer automatically goes back to normal operation.

The standard program

Your system will come on for up to 3 heating periods every 24hrs. ON1 starts the first period, OFF1 finishes it, and so on. Notice that ON2 and OFF2 are set to the same time.* This means your system won't respond, but if you want to activate that middle period, or change any other timings - read on.

THE LP522Si 5/2-DAY ELECTRONIC PROGRAMMER Cont...

Changing the timings

Press the SET? button and you'll see 'SET PROG?'

Set the weekday central heating

Press the YES button, and the display will ask 'SET CH MON to FRI PROG?

Press YES and you'll see ON1, the start of your first central heating period. Adjust it in 1-minute steps using the - and + buttons. If the - and + buttons are held down, the time changes in 10-minute steps.

Press SET?, and you'll see OFF1, the end of your first central heating period. Adjust this in the same way, press SET?, then repeat the procedure for ON2, OFF2, ON3 and OFF3.

Set weekday hot water

When you press SET? after setting OFF3 for the central heating, the display will ask 'SET HW MON to FRI PROG?'

Press YES, then set your times in the same way. Remember, in this mode you can have different times to your central heating if you wish.

Set weekend central heating

When you press SET? after OFF3 for the weekday hot water, the display will ask 'SET CH SAT SUN PROG?'. Press YES to confirm, and alter the times in the same way.

Set weekend hot water

When you press SET? after OFF3 for the weekend central heating, the display will ask 'SET HW SAT SUN PROG?'. Press YES, and follow the procedure.

When you press SET? after OFF3 for HW SAT SUN, the programmer will go back to normal operation.

THE LP722Si 7-DAY ELECTRONIC PROGRAMMER

LP722Si – a 7-day program allowing for different timings on each day of the week, with central heating and hot water working independently for up to 3 heating periods each day.

If the timings haven't been set for you, then your programmer will still be on the factory-set standard program. This has central heating and hot water operating together – with the option of having different timings for each day of the week. But it's easy to make changes, and have heating and water working independently - just follow the instructions.

Want to leave a timing as it is? Press SET? and move on to the next one.

If you need to reset your timings to the standard program and start again, press 'SET' and '+' together to go back to the pre-set program

If you don't press anything for two minutes, the programmer automatically goes back to normal operation.

The standard program

Your system will come on for up to 3 heating periods every 24hrs. ON1 starts the first period, OFF1 finishes it, and so on. Notice that ON2 and OFE2 are set to the same time * This means your system won't respond, but if you want to activate that middle period, change any other timings - read on.

SWITCHING	WEEK	DAYS	WEEKENDS		
Switchind	нw	СН	нw	СН	
ON 1 – start of first timed period	6.30am	6.30am	7.00am	7.00am	
OFF 1 – end of first timed period	8.30am	8.30am	9.00am	9.00am	
ON 2 – start of second timed period*	12.00pm	12.00pm	12.00pm	12.00pm	
OFF 2 – end of second timed period*	12.00pm	12.00pm	12.00pm	12.00pm	
ON 3 – start of third timed period	4.30pm	4.30pm	4.00pm	4.00pm	
OFF 3 – final switch-off of the day	10.30pm	10.30pm	11.00pm	11.00pm	

Changing the timings

Press the SET? button and you'll see 'SET PROG?'.

THE LP722Si 7-DAY ELECTRONIC PROGRAMMER Cont...

Set all weekdays

- First you set the times that are going to be the same for each weekday, then you can select each day individually and make any further adjustments. If you want each day to be quite different, go straight to 'Set each day.'
- Press the YES button, and the display will ask 'SET MON to FRI PROG?'.

Press YES and the display will ask 'SET CH MON to FRI PROG?'

Press YES, and you'll see ON1, the start of your first central heating period. Adjust it in 1-minute steps using the - and + buttons. If the - and + buttons are held down, the time changes in 10-minute steps.

Press SET?, and you'll see OFF1, the end of your first central heating period. Adjust this in the same way, press SET?, then repeat the procedure for ON2, OFF2, ON3 and OFF3.

8:30rm

When you press SET? after setting OFF3 for the weekday central heating, the display will ask 'SET HW MON to FRI PROG?'.

SET

Set each day

If, after you've set OFF3 for your hot water, you want to fine-tune one or more weekdays, press SET? until you find the first day you want to adjust - then go through the procedure, altering any time you wish. Press SET? to move on to the next day. When you've finished, press SET? until you see 'SET SAT SUN PROG?'.

If you don't want to alter any individual days, keep pressing SET? until you see 'SET SAT SUN PROG?'.

Set weekend

- Press YES, and alter the central heating and hot water times in the same way.
- When you press SET? after OFF3 for HW SAT SUN, the programmer will ask the question TEST? If you want to test your program, see below, otherwise press SET? again. If you don't want to test your program, press SET? again - and you'll be asked the question SET H'DAY? If you want to set a holiday itch off, see page 23, otherwise press SET? again.If you're not going to program in a holiday switch-off, then press SET? again and your programmer will go back to normal operation.
